

# Complex Fluids: Proceedings of the XII Sitges Conference, Sitges, Barcelona, Spain, 1-5 June 1992 (Lecture Notes in Physics)

This set of survey talks presented to graduate students serves as a thorough exposition of the subject. The study of complex fluids (with internal structure) is important for theoretical purposes but also, and maybe even more so, for applied research. The reader will find papers on colloid mixtures, the structure of DNA mesophases, ferrofluids, chain dynamics, liquid crystals, computer simulations of macromolecules, fluidization, emulsions, relaxations and many other related topics.

Title, Complex Fluids: Proceedings of the XII Sitges Conference, Sitges, Barcelona, Spain, 1-. Volume 415 of Lecture notes in physics. PublisherComplex fluids : proceedings of the XII Sitges conference, Sitges, Barcelona, Spain, 1-. [L Garrido] -- This set of survey talks presented to Series: Lecture notes in physics, 415. Edition/Format: eBook : Document : ConferenceComplex Fluids: Proceedings of the XII Sitges Conference, Sitges, Barcelona, Spain, 1- (Lecture Notes in Physics).
